AUTO Aficionado

Celebrating the Automobile Culture and its Enthusiasts

Below, from the top: The crew at Creative Workshop in Dana Beach, Florida is creating a Ferrari TR-like sports car with a 50s tubular space frame, an F1-style BMW V-12 and Brembo disc brakes – not a hot rod, but a new-construction, one-off sports roadster. These photos illustrate the tubular *manichino* as used by Tom Meade (AA Jan/Feb '07)) and the foam panels for body forming.
